EDUCATION

École Polytechnique Fédérale de Lausanne (EPFL)

Sep 2025 – Jul 2026

Selected for a year-long exchange at one of Europe's top-ranked technical universities.

- **Relevant Courses:** Advanced Computer Graphics, Computer Security, Mobile Networks, Software Enterprise

The University of Edinburgh

Sep 2023 – Jul 2027 (Expected)

BSc (Hons), Computer Science and Artificial Intelligence

- **Relevant Courses:** Data Science, Algorithms and Data Structures, Software Engineering, Computer Systems

George Watson's College

2015 – 2023

- **Advanced Highers** in Computer Science, Graphic Communication, Biology
- **Scottish Highers** in Computer Science, Mathematics, Graphic Communication, Biology, Chemistry

EXPERIENCE

Data Science Intern

Aug 2025

Group Amana

Dubai, UAE

- Introduced to the structure and workflows of the Data Science team, gaining experience in the full analytics lifecycle (request → build → testing → deployment).
- Worked with real company datasets to design data pipelines, perform transformations, and ensure data quality and consistency across multiple sources.
- Developed interactive dashboards in Power BI, including Tender Performance and Retail Sales, applying DAX measures, KPIs, and advanced visualisations to support business development insights.
- Delivered a final presentation of the Tender Performance dashboard to the team, highlighting its business value and reflecting on practical applications of analytics in a large enterprise.

Other Employment

Customer Advisor - Argos, Edinburgh

Nov 2024 – May 2025

Lifeguard - West Lothian Leisure, Linlithgow

Aug 2022 – Sep 2023

PROJECTS

HackTheBurgh XI: 1st Place Winner. Built a predictive model in Python (pandas, scikit-learn) on 800K+ data points to analyse Cane Toad impact on crop yields in Australia; presented results via a React-based web app.

DurHack X: QRT Winner. Developed a tool for optimising global meeting locations using reinforcement learning, trained on real flight data across 700+ destinations. Built the frontend in React and Cesium for interactive 3D flight visualisation, and integrated a FastAPI backend.

HackaHealth 2025: Assistive Communication App. Developed RealEmotion, a React Native iOS app enabling non-verbal individuals to communicate with emotion through AI-generated speech. Integrated the Hume AI API for expressive voice synthesis and deployed the app via Xcode on iPhone.

EPFL Life: Student Events App. Built an Android app in Kotlin using Firebase Auth and Firestore to centralise student events. Implemented association-managed event publishing, social attendance tracking, personalised calendars, and map-based event discovery. Led UI/UX design in Figma and contributed across frontend and backend development. Developed in 10 weeks and currently under approval on the Google Play Store.

ADDITIONAL INFORMATION

Technical: Python, Java, C, Kotlin, SQL, JavaScript, HTML/CSS, React, pandas, Git, Power BI, MIPS Assembly

Awards: Artificial Intelligence in Healthcare (2025), Diploma in Japanese Language (2024), Graphic Communication Prize (2022, 2023), Duke of Edinburgh Gold (2019-2022)

Interests: Swimming (International competitor, 12+ years), Ski Racing (15+ years), Guitar (Grade 8, 10+ years)
